SKILLS

Solidity
Smart Contract Development
Ethereum
Cryptography
Web3.js
Blockchain Architecture
Security Auditing
zkSync Network
Token Standards
DeFi Protocols

EDUCATION

Master of Computer Scienc
Colorado Technical University
2013-2015

LANGUAGES

English
German

PROFILE

Highly skilled and experienced Blockchain Developer with 10 years of expertise in solidity, smart contract development, cryptography, and forking popular DeFi protocols. Seeking a challenging position to leverage my extensive knowledge and skills in blockchain technology to drive innovation and contribute to the success of a dynamic organization.

WORK EXPERIENCE

Senior Blockchain Developer

7 PH Technologies,Inc 2016- 2023

- Developed and implemented blockchain solutions using zkSync network and BRC20 token standards.
- Integrated zkSync layer 2 scaling solution into existing blockchain infrastructure, significantly improving transaction throughput and reducing fees.
- Design, develop, and deploy innovative blockchain-based applications using Solidity and Ethereum platform to meet the specific needs.
- Implement and audit smart contracts for various use cases, ensuring security, reliability, and adherence to industry best practices.
- Fork popular DeFi protocols such as PancakeSwap, Olympus DAO, Tomb Finance, and Titano, customizing them to align with the unique requirements.
- Conduct comprehensive code reviews and security audits, identifying and fixing vulnerabilities in smart contracts to ensure the highest level of security and integrity.

Blockchain Developer

Ingsoftware 2015-2016

- Collaborate with the team to design, develop, and implement blockchain solutions using various platforms such as Ethereum, Hyperledger, and Corda.
- Conduct thorough testing and debugging of smart contracts, identifying and resolving any issues or vulnerabilities.
- Research and stay updated on emerging blockchain technologies and industry trends, providing insights and recommendations for technology adoption.
- Collaborate closely with cross-functional teams including product managers, designers, and other developers to define project requirements and deliver high-quality blockchain solutions.
- Provide technical guidance and support to junior developers, helping them learn and grow in their blockchain development skills.
- Contribute to the improvement of development processes and coding standards to enhance efficiency and maintainability.
